AND WALK**

**9TH ANNUAL CHARLOTTE FAMILY FESTIVAL  
AND WALK FOR BLEEDING DISORDERS**

**Saturday, April 22, 2023**

Check in: 9 AM

Announcements Followed by Walk Start: 9:45 AM

**S. Mint Street, Charlotte, NC**

# WELCOME!

***Welcome to the Bleeding Disorders Foundation of North Carolina's  
9th Annual Charlotte Family Festival & Walk.***

We're so happy that you have joined us. Today we celebrate the bleeding disorders community and the strength and resilience that those impacted by a bleeding disorder exhibit daily.

This event wouldn't be possible without all the teams, individuals, donors, volunteers, and sponsors. Thank you!

Finally, if you would like to donate, please scan the QR code.

Thank you!

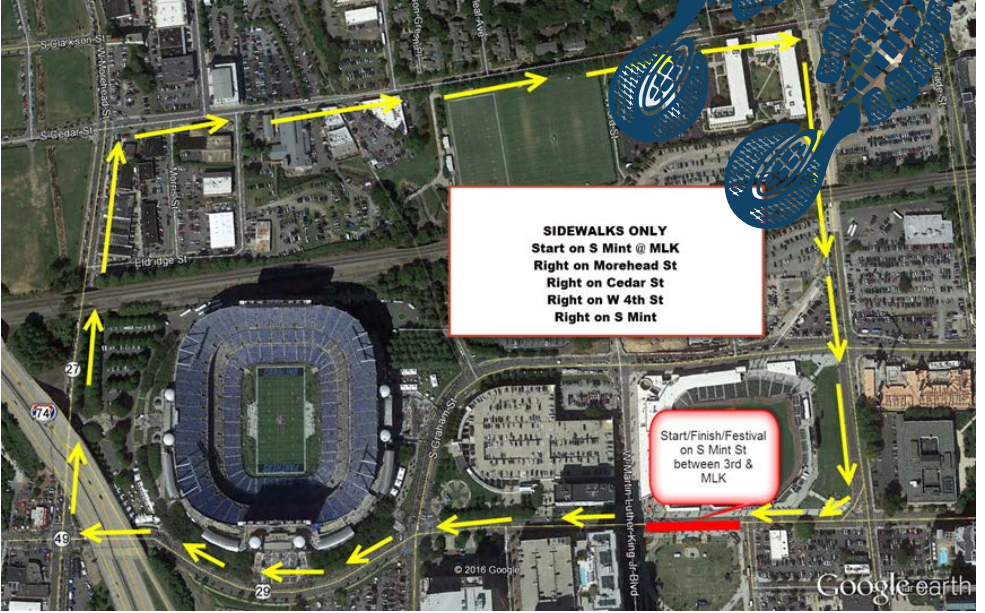

*Charlene & Gillian*

# FACTOR UP with ALTUVIIIO™

ALTUVIIIO™  
Antihemophilic Factor (recombinant),  
Fc-VWF-XTEN fusion protein-eht

Higher-for-longer Factor VIII levels in the near-normal to normal range (**over 40%**) for most of the week

**HIGHER FACTOR LEVELS FOR LONGER**  
Above 40% for most of the week (near-normal to normal range).<sup>1</sup>

**48**

**HOUR HALF-LIFE IN ADULTS**  
In a Phase 3 study,<sup>1</sup> ALTUVIIIO offered adults the longest half-life of any Factor VIII therapy.

**0.7**

**BLEEDS PER YEAR!**  
Mean annual bleed rate observed in 128 people previously treated with prophylaxis therapy.<sup>1</sup>

In people taking ALTUVIIIO in the XTEND-1 study, 21% of people had headache, 16% had joint pain, and 6% had back pain

<sup>1</sup>Average trough levels were 58% for adults 18 years and older, 9% for adolescents aged 12 years to under 18 years, 30% for children aged 6 years to under 12 years, and 7% for children aged 3 years to under 6 years.  
<sup>2</sup>159 adults and adolescents with severe hemophilia (aged 12 years and older) were enrolled in the XTEND-1 study; 133 people were in Group 1 and switched to ALTUVIIIO prophylaxis from prior prophylaxis therapy. Efficacy of prophylaxis was evaluated in 128 of these patients.  
<sup>3</sup>Data based on treated bleeds.

## CONNECT WITH YOUR CoRE TODAY

### INDICATION

ALTUVIIIO™ [antihemophilic factor (recombinant), Fc-VWF-XTEN fusion protein-eht] is an injectable medicine that is used to control and reduce the number of bleeding episodes in people with hemophilia A (congenital Factor VIII deficiency).

Your healthcare provider may give you ALTUVIIIO when you have surgery.

### IMPORTANT SAFETY INFORMATION

**What is the most important information I need to know about ALTUVIIIO?**

Do not attempt to give yourself an injection unless you have been taught how by your healthcare provider or hemophilia center. You must carefully follow your healthcare provider's instructions regarding the dose and schedule for injecting ALTUVIIIO so that your treatment will work best for you.

**Who should not use ALTUVIIIO?**

You should not use ALTUVIIIO if you have had an allergic reaction to it in the past.

**What should I tell my healthcare provider before using ALTUVIIIO?**

Tell your healthcare provider if you have had any medical problems, take any medications, including prescription and non-prescription medicines, supplements, or herbal medicines, are breastfeeding, or are pregnant or planning to become pregnant.

**What are the possible side effects of ALTUVIIIO?**

You can have an allergic reaction to ALTUVIIIO. Call your healthcare provider or emergency department right away if you have any of the following symptoms: difficulty breathing, chest tightness, swelling of the face, rash, or hives.

Your body can also make antibodies called "inhibitors" against ALTUVIIIO. This can stop ALTUVIIIO from working properly. Your healthcare provider may give you blood tests to check for inhibitors.

The common side effects of ALTUVIIIO are headache, joint pain, and back pain.

These are not the only possible side effects of ALTUVIIIO. Tell your healthcare provider about any side effect that bothers you or does not go away.

Please see full [Prescribing Information](#).
